SUPPLEMENT

## DISTRIBUTION

[illegible]

1. Flamethrower Units: A Flamethrower Company is included in every Army Engineer Pioneers Regiment. These companies at present are equipped with small German flamethrowers (Leichter Flammen Werfer 41 Model) with inflammable liquid ejected to compressed air and not azote. A certain number of small armored vehicles are attached to these units. Personnel have German protective clothing.
2. Chemical Warfare: Every Regiment has 80 men who are trained in anti-gas measures. Some armored units have old German and Russian protective clothing which is not considered at all effective for modern warfare. Anti-gas respirators have no tubes. Masks for dogs and horses are only being issued to horse-drawn anti-tank units, frontier guard and intelligence units.
3. Aircraft Factory: In the aircraft factory at Lovca plans have been drawn up for the construction of the following items before 1 January 1948:
  - 95 Tractors
  - 20 Grinding machines
  - 60 Transformers
  - 20 Electric motors
  - 500 Pneumatic drills
